Independent assurance for high-consequence industries

Istanbul-based since 2006

We provide inspection, certification, testing, auditing and project management to clients in the Oil & Gas, Power and Manufacturing industries.

The name is the scope

3D InCertA — INspection, CERTification, Testing, Auditing. A highly qualified team of engineers, industrial inspectors and designers who have delivered major projects in Türkiye and abroad.

We come to the work

Serving clients locally matters to us. Inspectors are relocated to project sites, so verification happens where fabrication happens — not where our office is.

The industries we serve

Oil & Gas

Refineries, terminals, pipelines and process equipment

Power Generation

Combined cycle plants, HRSG boilers and steam systems

Nuclear

ASME Section III scope: NPT, NA, NS and MO certification

Chemical & Petrochemical

Storage, cryogenic and reactive-service assets

Manufacturing & Fabrication

Pressure vessels, tanks, piping and structural steel

Construction & Infrastructure

Bridges, ports, terminals, hotels and shopping centres

Delivered in 17 countries

Where our inspectors have carried out certification, inspection and NDT work.

TÜRKIYE & CAUCASUS

Certification against the codes your contract is written to

Codes & standards we certify to

ASME Nuclear

ASME Non-Nuclear

EN

ISO

API

AWS

Reference disciplines: fabrication, mechanical design review, material science, welding and NDT.

Who we work for

Manufacturers, construction and assembly companies, and operators across Oil & Gas, Power and Chemical — many of whom have kept us on since their first certification.

Risk management & technical support

HAZOP, HAZAN, HAZID and RBI studies plus technical support and training for refineries and the oil, gas and power sector.

An aerial photograph of a large industrial facility, likely a power plant. Several large, circular cooling towers are visible, with thick white plumes of steam or smoke rising from them. A network of pipes and walkways crisscrosses the site. In the background, there are several large, rectangular industrial buildings. The overall scene is captured in a dark, moody tone, with the white steam providing a stark contrast.

03

ASME SERVICES

Power generation and pressure equipment

Certification for boilers, headers, pressure vessels and piping — under ASME Nuclear and Non-Nuclear codes.

The largest ASME inspection practice in Türkiye

5

ASME Authorized Inspectors,
serving clients in Türkiye and
overseas

2

Also hold ASME Authorized
Nuclear Inspector qualification

2

ASME Supervisors, covering
both Nuclear and Non-Nuclear
scope

26

ASME stamp-holder companies
inspected in Türkiye

60% of every company in Türkiye holding an ASME Certificate of Authorization
is served by a 3D InCertA Authorized Inspector.

A certification record built plant by plant

Power plants — ASME S certification

Sumgait / Azerbaijan · Yajva / Russia · Deir Ali / Syria · Sulaymaniyah, Erbil and Baghdad / Iraq · Dubai Aluminium / UAE · Alexandria / Egypt

Europe — ASME Sec. I, B31.1 and PED

Certification activities carried out at power plants in England, Spain and Portugal.

Nuclear — both certified companies in Türkiye

Türkiye has two ASME Nuclear certified companies and we carried out the certification process for both — the first authorized for NPT, NA, NS and MO since 2006, the second completed in May 2026.

Live today

Our ASME team is currently engaged in certification activities across four different countries.

EU Notified Body 2530

One number, two directives — European market access handled in-house.

PED 2014/68/EU

PRESSURE EQUIPMENT DIRECTIVE

- Notified Body under the Pressure Equipment Directive
- Competent to authorize NDT personnel within the PED scope
- 9 inspectors assigned as PED NoBo Inspectors

CPR 305/2011

CONSTRUCTION PRODUCTS REGULATION

- Notified Body under the Construction Products Regulation
- 7 inspectors assigned as CPR auditors (System 2+)
- 4 auditors qualified for EN 1090-1

Verifiable, and a first for Türkiye

Listed publicly on NANDO

Our Notified Body status (NoBo 2530) can be verified on the European Commission's NANDO database at ec.europa.eu.

A first in Türkiye

8 LPG spherical tanks certified to PED and ASME Sec. VIII Div-2 (U2) with CE marking — the first time this had been applied in Türkiye.

Pressure equipment placed on the European market under PED

NOTIFIED BODY PROJECT RECORD — HRSG BOILERS & COMBINED CYCLE POWER PLANTS

Pego / Portugal

Málaga / Spain

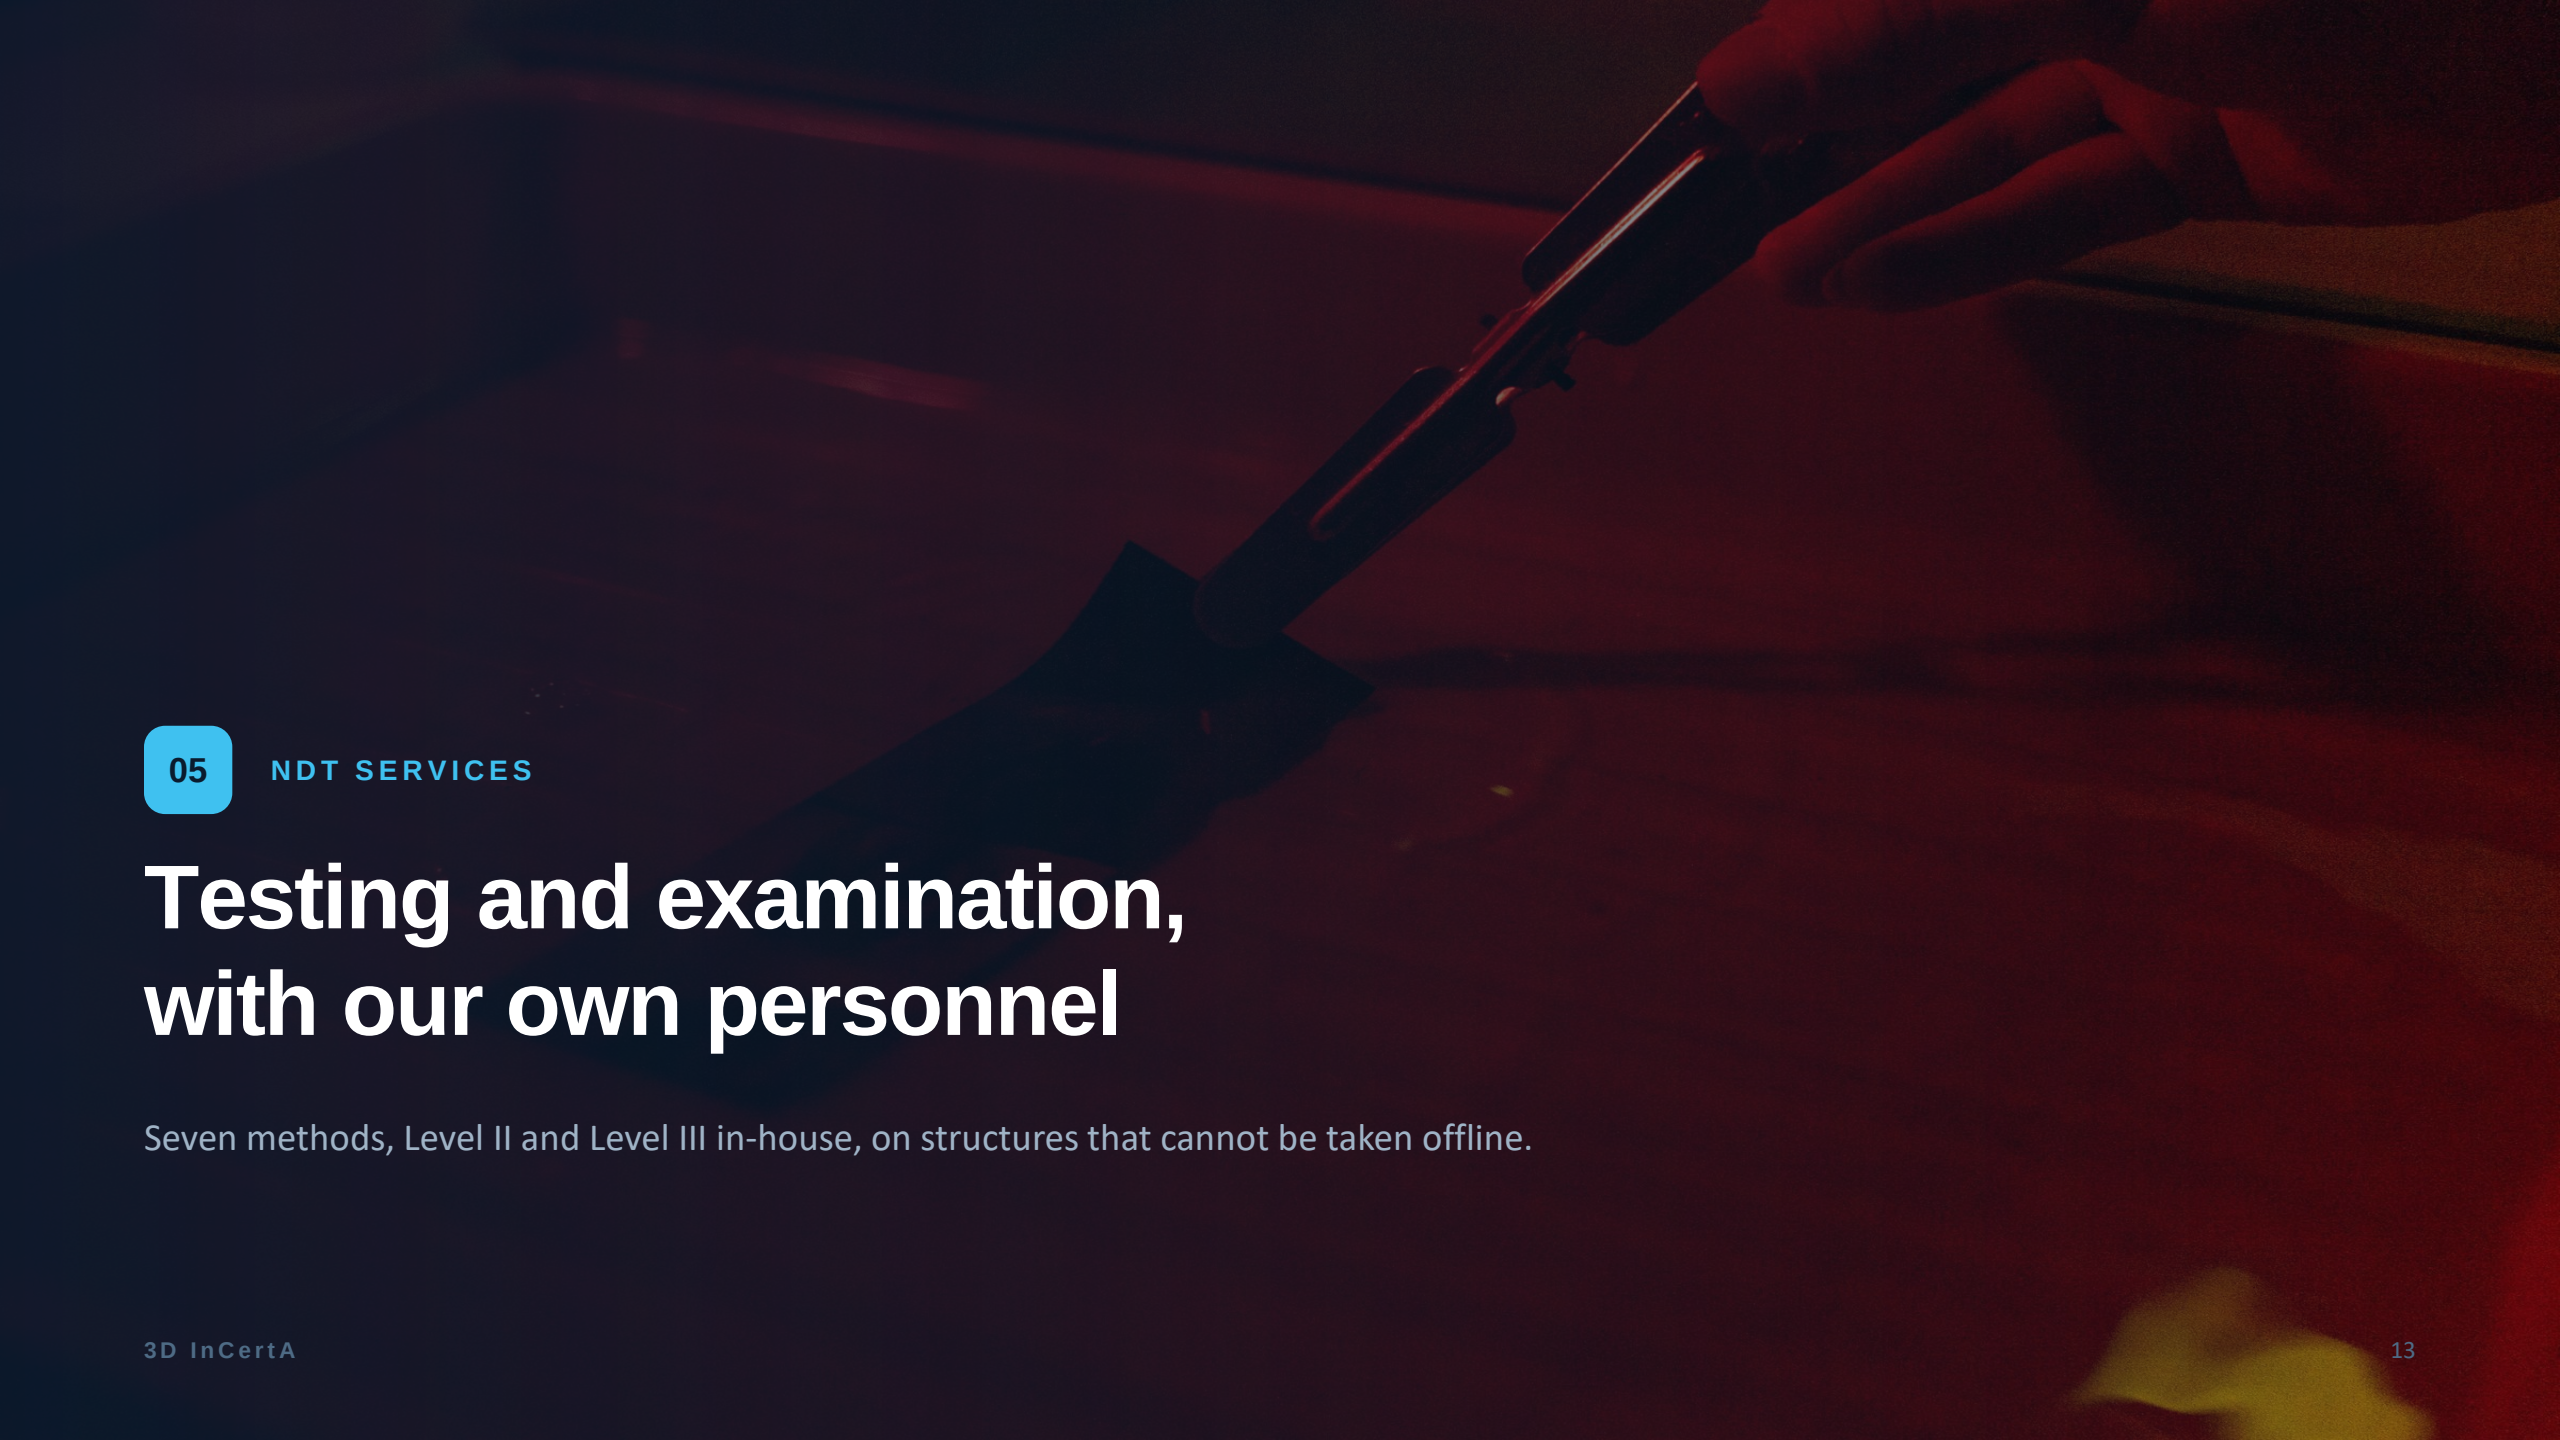

Mongstad / Norway

Fos-sur-Mer / France

Modugno / Italy

Plymouth / UK

Manchester / UK

A dark, moody background image showing a hand holding a probe or tool, possibly for testing or examination, over a surface. The lighting is low, with a strong red/orange tint, creating a dramatic effect.

05

NDT SERVICES

Testing and examination, with our own personnel

Seven methods, Level II and Level III in-house, on structures that cannot be taken offline.

Seven NDT methods, all with our own personnel

VT

Visual

RT

MT

Magnetic Particle

PT

Penetrant

UT

Ultrasonic

TOFD

Time of Flight

PA

Phased Array

Level II and Level III in-house

Examinations are performed by our own certified Level II and Level III personnel — never subcontracted.

Procedures to your spec

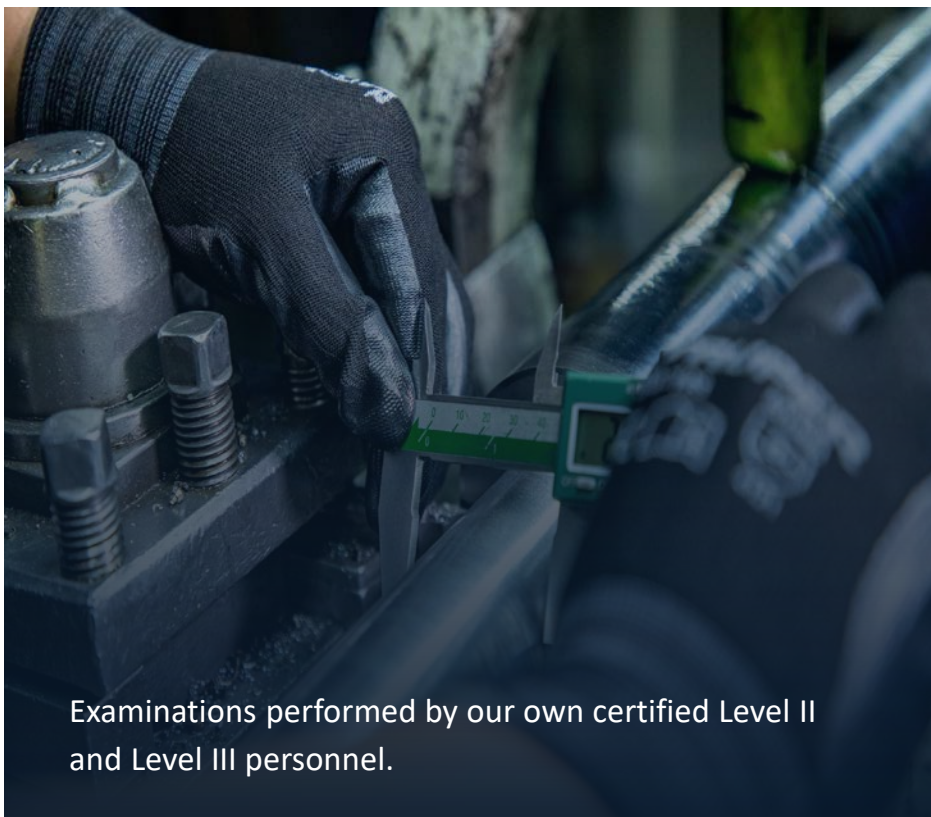

We develop NDT procedures, instructions and technical specifications to client requirements.

Certification of your people

Personnel training and certification under TS EN ISO/IEC 17024, TS EN ISO 9712 and SNT-TC-1A.

Trusted on structures that cannot be taken offline

Istanbul bridge repair programme

NDT activities for the repair project of the 15 July Martyrs Bridge and the Fatih Sultan Mehmet Bridge, carried out for IHI Infrastructure.

Osman Gazi Bridge, Kocaeli

NDT on the world's third-largest suspension bridge, performed for Çimtaş and IHI.

ENKA Power combined cycle plants

Long-term in-service inspection and NDT services provider for the operating plants at Adapazarı, Gebze and İzmir.

Welding engineering and system certification under one roof

THE TEAM

8

IWE / EWE Welding Engineers

1

CSWIP Welding Inspector

Accredited to EN ISO 17024

Welding documentation

Preparation and approval of PQR, WPS and WPQ to ASME, EN, ISO, AWS and API standards.

Certification Body

For EN ISO 3834 (fusion welding quality requirements) and EN 15085 manufacturer certification for railway vehicle quality systems, under EN 17065 accreditation.

Welder training

Practical and theoretical training delivered to welders and welding operators on request.

Verification from raw material to delivered equipment

What the scope covers

- 2nd and 3rd party inspections for end-user companies, EPC contractors and manufacturers, on domestic and multinational projects.
- Every fabrication process from raw material to end product — design, process control, equipment delivery verification and supplier quality checks, all to your specification.
- Mechanical, electrical, automation and construction inspection of exported domestic products and of foreign products destined for use abroad.

Where our own people can't go, our partners can

Inspections are performed by 3D InCertA's own personnel or, where it is not possible or economic to send them, through our partner inspection bodies abroad. Clients get the same reporting standard at worldwide locations.

Selected third-party assignments

Borusan Mannesmann · Noksel

Third-party inspection of pipes for pipeline projects in Türkiye, Algeria, Israel and the Czech Republic.

GEA Group (Wiegand, Messo) · UOP

Long-term inspection and expediting for crystallizers, evaporators, separators and refinery equipment.

K-PET Terminal, Cyprus

All construction third-party site inspection: fuel-oil tanks to API 650, LPG tanks to AD 2000 and piping to ASME B31.3.

Gübretaş, İzmit

API 620 certification of a double-walled ammonia tank, completed by our team.

Construction inspection, from foundations to handover

Industrial infrastructure

Construction inspection including infrastructure activities for industrial plants, terminals, ports, refineries, petrochemical facilities and power plants.

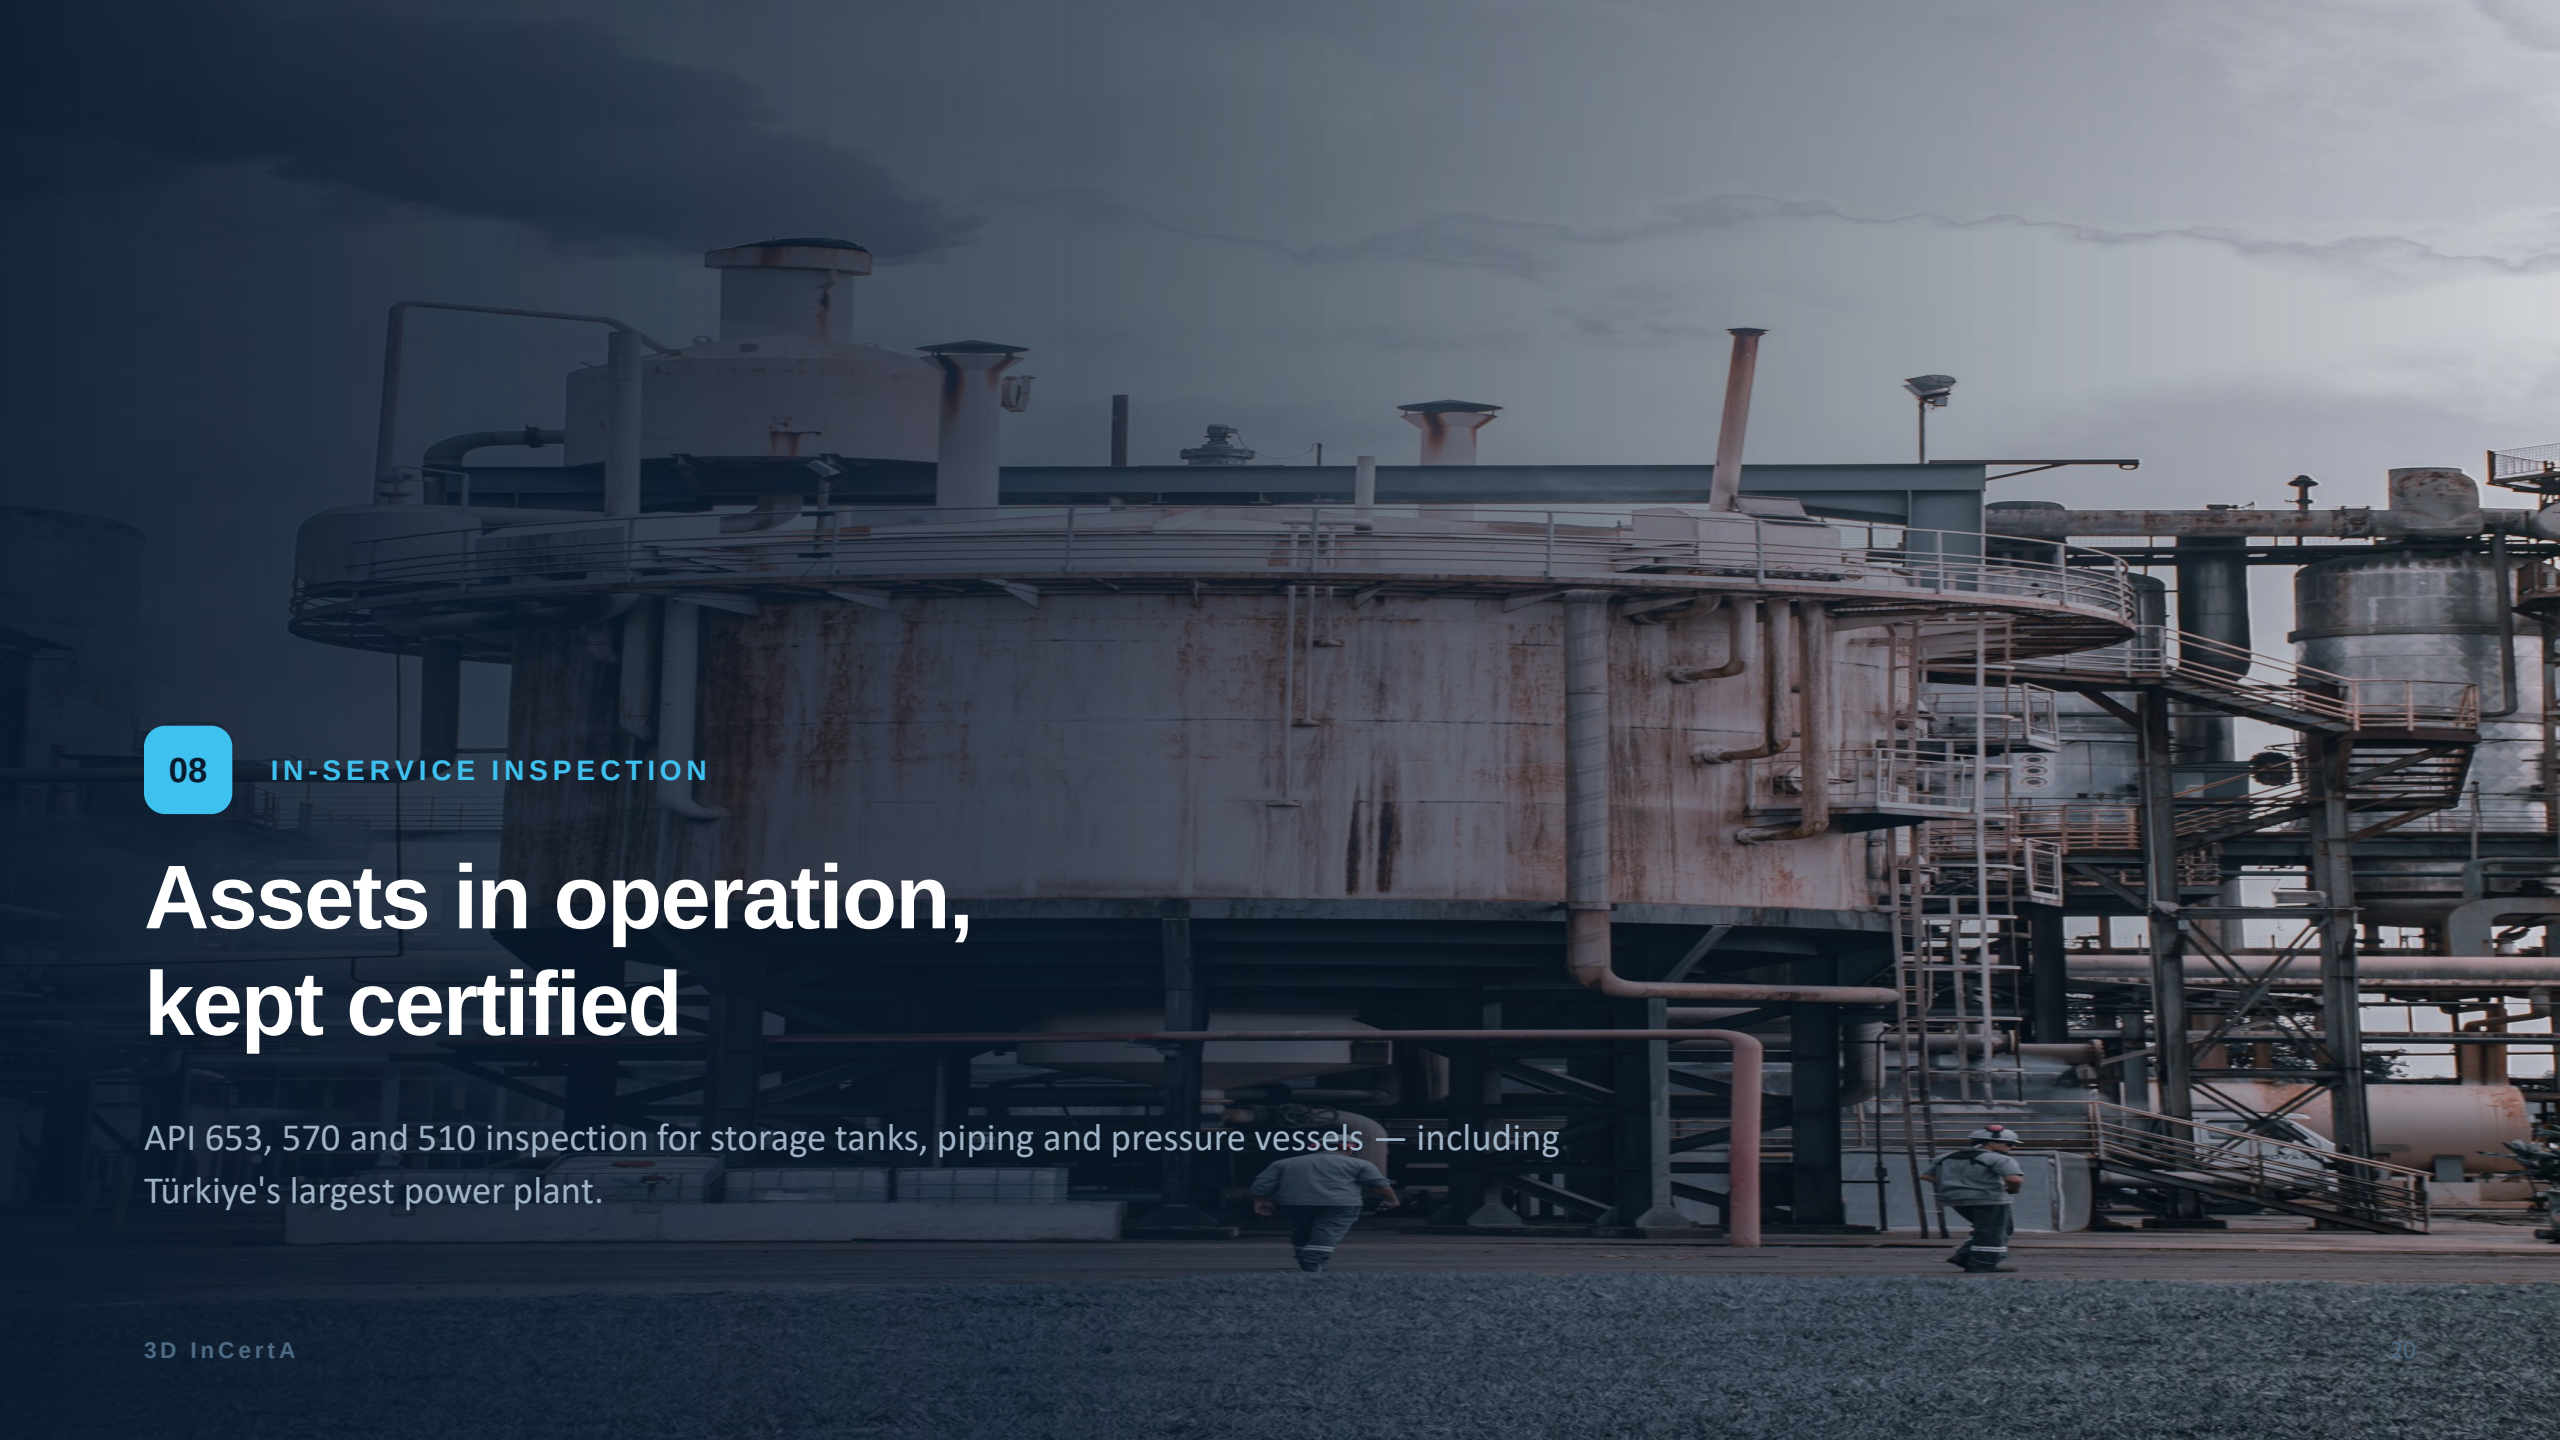

Building technical inspection

Verification that materials, components and the construction itself conform to the technical specification and applicable technical rules — for shopping malls, hotels and ports.

DELIVERED ON

Yavuz Sultan Selim Bridge · K-PET Storage Tank Farm, Cyprus · Safiport, Kocaeli

08

IN-SERVICE INSPECTION

Assets in operation, kept certified

API 653, 570 and 510 inspection for storage tanks, piping and pressure vessels — including Türkiye's largest power plant.

Keeping operating assets certified and on-line

Qualified to the API inspection codes

- API 653 — Aboveground Storage Tank Inspectors
- API 570 — Piping Systems Inspectors
- API 510 — Pressure Vessel Inspectors

Yılport

In-service and out-of-service inspection of 75 storage tanks to API 653 and API 570.

Total Oil, İzmir terminal

In-service inspection of 5,000 m³ LPG spherical tanks and their piping systems.

ENKA combined cycle plant — 4,500 MW

Türkiye's largest power plant. In-service activities are carried out by 3D InCertA under a long-term operation and periodical control services contract.

Quality confirmed before it leaves the factory

Inspection at source

We inspect items at their place of manufacture, before delivery, so quality and safety problems are caught upstream rather than on your site.

What we check

Design review, material certificate review, visual inspection, NDE, and witness or performance of mechanical and functional tests before release.

Worldwide, and fast

Competent personnel with relevant experience and qualification on demand, backed by worldwide partnership agreements covering GOST, SASO/SABER, CRN, DOSH and similar certification.

Recent design review assignments

MİMAŞ A.Ş.

52 m³ and 63 m³ pressure vessel design review to ASME Sec. VIII Div.1 (2010 Ed., 2011 Add.) and to PETROFAC's specification.

SIGMA PROCESS

Design review of 34 chemical tanks to EN 14015 and API 650.

SAFIPORT

Design review of 33 storage tanks to API 650.

ÜNKA CONSTRUCTION

Design review of 4 pressure vessels to ASME Sec. VIII Div.1 (2007 Ed., 2009 Add.), plus thermal and mechanical design review of the 19E-602 heat exchanger manufactured for TÜPRAŞ.

ERGİL MAKİNE

Design review of a PIG receiver and launcher for Deresco.

Cryogenic certification, including cold stretching

Cold-stretching process for pressurised equipment

Carried out to EN 13458 and ASME Sec. VIII Div.1 Appendix 44.

LNG

LIN

LAR

LOX

NH₃

Vessels and terminal tanks

Cryogenic inspection services are performed on cryogenic vessels at manufacturing plants and on large-scale tanks at terminals.

Gübretaş İzmit Terminal

Third-party inspection of cryogenic storage tanks, piping, valves and other instruments at one of the biggest ammonia storage terminals in Türkiye.

12

TRAINING

The people who inspect, teaching the people who build

Theoretical and practical training across ASME, API, AWS, EN, ISO and the European directives.

Training delivered by the people who do the inspections

Codes and standards

Theoretical and practical training on ASME, API and AWS codes and on RCC-M, ISO and EN standards, delivered by highly qualified and experienced instructors and specialists.

NDT personnel certification

NDT personnel certification training in accordance with EN ISO 9712 and SNT-TC-1A, under our ISO/IEC 17024 accreditation.

Health, safety and site skills

Practical health and safety education for construction equipment, scaffolding and bolted flange assembly — for the crews doing the work.
